Try this Answers will vary.

Imagine it is ten years in the future. Write about what Tina and Milo were able to do.

Tina

Tina was able to work part time while she studied. She was able to build her resume before graduation and get a good job. She managed to buy a nice house and was able to donate some money to scholarships for other students.

Milo

Milo was able to work on his own projects in between contracts. He managed to invent a useful smart phone app, which sold well and made him a lot of money.

Read the text again. What do you think Molly will be able to do in ten years time? What about Mr and Mrs Clancy?

Molly

Molly will be able to save enough money to send her daughter to a good school. After her back heals, she will be able to work again. She will manage to do well at work while taking care of her daughter.

Mr and Mrs Clancy

They will be able to pursue their own interests. Since they can't travel, they will study foreign languages. The first time they manage to have a conversation with a native speaker over online video chat, they will feel very accomplished.

How about you?

*Do you have something in common with any of the people in the text? Did you work while you studied like Tina, or invest when you were younger like Mr and Mrs Clancy?
I was injured and lost my job like Molly, but I was good with computers like Milo, so I was able to work from home while I recovered.*

*What will you be able to do in ten years time? Write down three things.
If I save enough money, in ten years I will be able to move into a big house.
Then I will be able to have a guest bedroom just for my friends.
I will be able to stay in my big house all day if I want.*
